

SEFRAM 5472DC, 54102DC, 54152DC

70MHz, 100MHz and 150MHz Digital Oscilloscopes

A NEW FAMILY OF DSO FROM 70MHz TO 150MHz FOR ALL YOUR TESTS & ELECTRONIC APPLICATIONS

Capabilities

- 2 channels, full bandwidth of 150MHz, 100MHz and 70MHz.
- Dual sampling mode: 1GSa/s Real-time sampling rate & 25GSa/s ETS
- 2Mega points memory length maximum
- Save/Recall of 15 front panel settings & waveforms
- 5.6" TFT color display for all models
- 27 auto measurements and Built in 6 digit real-time frequency counter
- Advanced trigger: Pulse Width, TV-Line
- PC interface support : USB Host for graphic/ data file storage and USB Device for PC connection
- Arithmetic operators +, -, x, FFT, FFT rms
- Multi-language option* and Built-in Help Menu
- Compact size
- Datalogger mode

**1 Gs/s
25 Gs/s in ETS
Memory : 2Mpoints**

SEFRAM 54152 DC

Hi level performances in a very compact design

Hi level performances

The new DSO adopts the Memory Prime technology, which installs a high speed signal processor to work in parallel with CPU to exceedingly raise up the waveform reconstruction speed. With this high speed signal processor and 2M point memory, the new family is able to run at 1GSa/s maximum sampling speed under a wide range of Time Base selections (100us/div ~ 25ns/div). This unparalleled performance creates a significant differentiation among all other economic DSO products available in the market today.

Easy to use

With the large TFT coloured screen, the convenient user interface it will be like a game to operate the new DSOs. User can access to all functions with on screen menus, with help screens. You can save up to 15 setup. The front panel is designed and optimized to find all commands very quickly.

Multiples functions

The new DSOs includes more and more functions to ease the measurements: and meet most of application in the market:

- Autoset, Datalogger mode
- Math functions: +, -, x, FFT and FFTrms
- 27 measurements functions, Go-No-Go

Interfaces

A USB device port with fully remote controllable capability and a USB Host slot for mass storage and recall of waveform data, screenshot, and panel setup are available with the new family.
